What useful feedback could you provide the professor of this course? (Please be specific.)

I personally wouldn't change anything. Your enthusiasm for the material was very encouraging. And I hope you can teach it again.

What were the best aspects of this course? (Please be specific.)

The actual programming was the best part. We built up practical skills, and saw a concrete expression of the math we were looking at.

What would you change about this course? (Please be specific.)

I would extend the class to a full semester. But that is all.

Please evaluate your own performance in this course. That is, are you satisfied with your accomplishments in this course? If not, what should you have done differently to improve your performance and/or comprehension of the course material?

I thought of quitting several times, but I am happy that I didn't. I'll admit that a lot of material went over my head. But, I came away with several practical skills that I'll be able to use in the future.
